BUY RECOMMENDATIONS

Compumedics (CMP)

Chart: Share price over the year

We expect this emerging medical device company to soon be selling its first new generation MEG (Magnetoencephalography) machine, with forecast **EBITDA** of \$3.5 million in 2016/17. The machine is suited to significant neurological disorders, such as Alzheimer's, Parkinson's, epilepsy and autism. MEG has a higher degree of sensitivity and faster measurement of brain signals than standard MRI (magnetic resonance imaging). We expect the company to continue its share price uptrend in response to good forecast sales of its MEG machine.
