BUY RECOMMENDATIONS

Emerchants (EML)

Chart: Share price over the year

Provides prepaid financial card products and services across Australia and Europe. Its systems for processing reloadable and non-reloadable payment cards are used by consumer lenders, gaming and other commercial operators and public service clients. Revenue and **earnings** are growing strongly. We expect a price/earnings multiple of more than 30 times this year to fall below 20 times in fiscal year 2017.
